

TAMANU ARNICA

SOOTHING
HERBAL CREAM

BEAUTY MEDICINE

Tamanu Arnica: this innovative cream is soothing and restoring sensitive skin in both adults and children. Rich in vegetable extracts, it can be used for many purposes: skin irritated by atmospheric agents, sun rash, chapped and dry skin, abrasion, scratch injuries.

Tamanu Arnica contains a highly sophisticated herbal combination. The properties of the European plants contained in this cream, such as: **Arnica, which is a well-established use in injuries; Calendula, renowned for its emollient properties; and Ninfæa, which is well-known for its excellent soothing properties**, are enhanced by their combination with Polynesian plants, whose traditional use has been validated by recent scientific studies: **Tamanu oil** (*Caulophyllum inophyllum*), **has remarkable restoring properties** anti-bacterial and anti-parasitic properties; and **Gardenia Tahitensis**, the emblem of Tahiti, regarded as "the flower for beauty", has been **used for centuries for dry and chopped skin**.

Tamanu Arnica contains quality and biocompatibility of its primary ingredients that make **Tamanu Arnica** ideal for even the most delicate skin of woman and babies.

Tamanu Arnica is also useful to disinfect skin area after mesotherapeutic treatment, as it avoids local inflammation.

PROFILE OF THE MAIN INGREDIENTS

Arnica	Has been used since ancient times in contusions .
Calendula	Has emollient properties for skin and improves skin functions.
Ninfæa	The extract used in TamanuArnica restores the integrity of the skin, by strengthening the natural defences against atmospheric agents and sun irritation.
Gardenia Tahitensis	Traditionally used in Polynesia for its hydrating, emollient and protective properties in the treatment of dry skin.
TAMANU	Recent studies have confirmed the validity of its traditional use throughout Polynesia. The Tamanu oil used in the cream has strong soothing properties, that help in restoring skin.
Bisabolol	Is an extremely precious vegetable oil, which has excellent decongestant and soothing properties; it is particularly suitable for delicate skins such as childrens'.
Tocopheryl acetate	Derived from Vitamin E, it is valued for its excellent anti-free radical properties.
Biocompatible emulsifiers	(Xylitylglucoside/Anhydroxylitol/Xylitol) – Trap water molecules and create functional barriers that protect against dehydration.
